

Interim report 1, 2011

Dirk W. Kirsten, CFO

Zurich – 28 April 2011

Disclaimer

This presentation contains forward-looking statements based on beliefs of Nobel Biocare's management. When used in this presentation, words such as "anticipate", "believe", "estimate", "expect", "intend", "plan" and "project" are intended to identify forward-looking statements. They may involve risks and uncertainties, including technological advances in the medical field, product demand and market acceptance, the effect of economic conditions, the impact of competitive products and pricing, foreign currency exchange rates and other risks. These forward-looking statements reflect the views of Nobel Biocare as of the date made with respect to future events and are subject to risks and uncertainties. All of these forward-looking statements are based on estimates and assumptions made by management of the company and are believed to be reasonable, though are inherently uncertain and difficult to predict. Actual results or experience could differ materially from the forward-looking statements. Nobel Biocare disclaims any intention or obligation to update these forward-looking statements.

in %

- EBIT margin (CER) down from 19.4% to 14.2% (before exceptionals)
- Operating leverage offset by gross margin decrease and higher operating expenses
- Exceptionals and FX impact decrease EBIT margin additionally by 3.7%

Interim report 1, 2011 10

Foreign exchange impact

FX impact on P&L lines (EUR million)

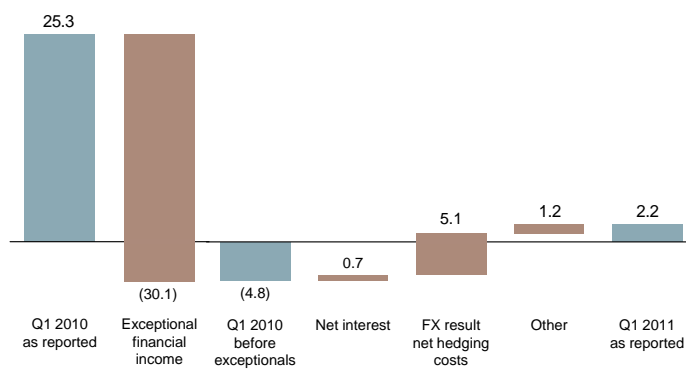

Comments

- Weaker EUR against most other currencies
- Over proportionally affected by stronger CHF, SEK
- Hedging result

Net financial result

EUR million

- FX result more than compensates negative currency impact on EBIT
- Continued improvements from net interest savings and other financial expenses

Net profit development

EUR million

Margin: 28.3%

9.0%

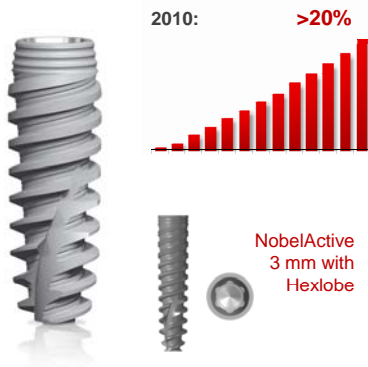

Operating cash flow development

EUR million

- Further improvements in working capital
- Almost unchanged cash position versus prior year

NobelActive: Ongoing launch success

Surgically innovative/Optimal prosthetic outcome

- High initial stability / less bone grafting
- Platform shifting to maximize soft tissue volume
- Documented by ongoing clinical research (RCT), prospective and retrospective studies
- 3mm portfolio expansion, expected Dec 2011
 - Narrow implant for situations with limited interproximal space, thin ridges
 - Innovative conical connection, tight fit
 - Strong material leads to high torque strength
- Comprehensive prosthetic portfolio

13 consecutive quarters with double-digit growth

Interim report 1, 2011 15

Introducing new generation NobelReplace

NobelReplace Platform Shift

- Easy to use tri-channel in connection with platform shifting
- Improved soft tissue interface and more natural looking esthetics

NobelReplace Conical Connection

- Third generation internal conical connection with built-in platform shifting
- Increased soft tissue volume
- Full portfolio of NobelActive prosthetic solutions

Successful pre-launch at the IDS – full launch planned for Q4 2011

Interim report 1, 2011 16

NobelProcera: Rollout gaining momentum

NobelProcera individualized abutments

- Global # 1 in individualized abutments
- Double digit growth
- Launch of additional implant platforms

Full contoured CAD-CAM e.max crown

- Addresses largest segment: single-tooth
- Fastest growing glass ceramic
- CAD/CAM: Consistent precision of fit and quality
- High predictability of treatment result

IPS e.max® CAD Crown by NobelProcera™ milled – crystallized – glazed
e.max is a registered trademark of Ivoclar Vivadent AG.
Disclaimer: Some products may not be regulatory cleared/released for sale in all markets.
Please contact the local Nobel Biocare sales office for current product assortment and availability.
